Datalogger MicroLog T3

Main features:

- Small datalogger primarily intended for soil temperature measurement with three Pt1000 A-class sensors
- High accuracy
- Water sealed case
- Infrared data access without opening the enclosure
- Manufactured by EMS

Specification:

- Three sensors connected
- Temperature range -20 to +60 deg. C
- Accuracy ± 0.2 deg. C
- Memory capacity 20,000 readings (2 years when measuring each hour)
- Battery capacity more than 5 years (when measuring each hour)
- Fully watertight – IP 68 rating
- Working range -20 to 60 deg.C
- High density Polyethylene case
- Size D70 x 40 mm (without connectors)
